Application/Control Number: 10/810,006

Art Unit: 3652

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a carrying device, classified in class 294, subclass 171.
 - II. Claims 15-20, drawn to a method for carrying bags, classified in class 294, subclass 159.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the process for using the product as claimed can be practiced with another materially different products such as bag carrying handles.
- 3. It is also pointed out that one of the following groups is further necessary to be elected if an apparatus is chosen.
 - 1) Claims 1-9, drawn to a handle with a strap or a loop, classified in class 294, subclass 74.
 - 2). Claims 1 and 10-14, drawn to a plurality of handles carrying a load, classified in class 294, subclass 152.
- 4. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination group II has separate utility such as plural handles connected by flaccid receiver or support (e.g., sling). See MPEP § 806.05(d). Note that Fig. 3 shows, a ring and a cable, Fig. 8 shows, a strap, a belt, a swivel, a bar, and a string, Fig. 11 shows two hand cuffs, a chain, a string, and a bar, Figs. 12-15 show a hand guard, two vertical posts, a

Application/Control Number: 10/810,006

Art Unit: 3652

bar, two separate strings, a clasp, and a hoop, Fig. 16 shows two handles and two separate strings, Fig. 17 shows three handles, a buckle, and strings, and Figs. 18 and 19 show a rack and a horizontal arm.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL T. CHIN whose telephone number is (571) 272-6922. The examiner can normally be reached on MON-THURS (7:30 -6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, EILEEN LILLIS can be reached on (571) 272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
